

Customer Service Charter

Lower Burdekin Water is a locally managed organisation that delivers sustainable water services for the prosperity of agriculture, industry, community and environment within the Burdekin region. Our groundwater area is considered the largest replenished coastal aquifer in Australia and it is the purpose of LBW to manage the groundwater system under our control in an environmentally and economically sustainable way, recognising that the economic viability of industry dependent on the resource is the essential foundation of sustainable environmental management. Recognising also that the system under our control is a modified environment, the management focus being on the development of a sustainable new balance of modified and pristine values.

Our Values

- Partnership: We engage with our workforce and stakeholders to deliver excellence
- Integrity: We value honesty, trustworthiness, transparency and high ethical standards
- Progressive: We embrace innovation and change
- Excellence: We operate at the highest standard to ensure long term sustainability
- Safety: We value the safety and health of our employees, stakeholders and environment.

You can help us by:

- Reporting safety hazards or incidents, maintenance concerns or damage to our infrastructure
- Treating our staff with courtesy and respect
- Providing us with constructive feedback (*you can find our Customer Feedback Process on our website*)

Complaints, Feedback and Dispute Resolution

Lower Burdekin Water aims to resolve complaints quickly and effectively. Please see our Customer Feedback Process located on our website for more information.

Invoicing

- Annual area rates for all crops are emailed in September each year and are due within 30 days. Payments are allocated to the ratepayers oldest debt first, unless an invoice is in dispute.
- Open water use invoices are issued each month following a meter reading taken by LBW operational staff when possible. Meter readings are scheduled at the end of each month and depend on access conditions.
- Statements are issued in the middle of each month.
- Interest is charged on all amounts outstanding after 60 days as per the Rates and Charges located on the LBW website.

Service Targets

Water Delivery

Lower Burdekin Water does not guarantee open water supply however we will do our utmost to deliver water to our open water customers. You must assist us with water delivery efficiencies by advising us of your proposed open water usage prior to starting your pump offtake.

Planned Shutdowns

Timing

LBW has an annual planned shutdown of two/three weeks usually coinciding with SunWater's annual shutdown to allow for works to be performed. It generally coincides with the start of the annual sugar mills crushing season. Water supply cannot be guaranteed during this time.

Duration

LBW will complete all planned shutdowns within the period notified to customers unless something occurs that is beyond LBW's control, such as adverse weather conditions.

Notice

- In excess of 2 weeks - at least 4 weeks written notice by email and SMS will be provided to each customer effected by the shutdown
- between 3 days and 2 weeks– at least 2 weeks notice by email and SMS will be provided to each customer effected by the shutdown
- Less than 3 days– at least 5 days notice by email and SMS will be provided to each customer effected by the shutdown

Each notice will state the start date and anticipated shutdown duration.

Unplanned Shutdowns

An unplanned shutdown is an unforeseen or emergency mechanical, electrical or operational failure of LBW's water delivery infrastructure that prevents or restricts the supply of water to a customer for more than 8 hours. It does not include events that are beyond LBW's control (eg extreme weather, power failure) and does not include low water levels in LBW channels due to customers taking water without placing a water order.

Duration

LBW will undertake repairs as quickly and as efficiently as possible to minimise outages however the duration of unplanned shutdowns will be on a case by case basis. Customers will be provided with progress updates by SMS.

Notice

LBW will notify all affected customers of the start time and anticipated shutdown duration by SMS and email within 24 hours of being notified of the event.

Recharge pits

LBW's ability to pump water into recharge pits depends on water turbidity levels and as such recharge pits will be utilised when conditions allow.
